

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Please cancel claims 10-17 prior to initial examination.

1. (NEW) A unitary film structure of a polymeric resin comprising a base film layer having generally parallel upper and lower major surfaces having projections being arranged in rows with at least 25 spaced projections per centimeter in a row projecting from at least the upper surface of said base.
2. (NEW) The unitary structured film of claim 1 wherein the projections are hook members which have head portions that extend in a direction transverse to the direction of rows of the hook members.
3. (NEW) A unitary hook fastener according to claim 2 having at least 30 spaced hook members per centimeter in a row.
4. (NEW) A unitary hook fastener according to claim 2 wherein said polymeric material is a thermoplastic resin and the hook head has rounded corners.
5. (NEW) A unitary hook fastener according to claim 2 having at least 50 spaced hook members per centimeter in a row.
6. (NEW) A unitary hook fastener according to claim 5 wherein said polymeric material comprises polyethylene, polypropylene, polypropylene-polyethylene copolymers or blends thereof.
7. (NEW) The unitary hook fastener according to claim 2 wherein at least the hook head portion has a molecular orientation of less than 10 percent.

8. (NEW) The unitary hook fastener according to claim 7 wherein the hook member base portion adjacent the base has a molecular orientation of at least 10 percent.

9. (NEW) The unitary hook fastener according to claim 7 wherein the base film layer is substantially unoriented.
